

Kona Compass — Market Research, Competitive Review, and Pricing Recommendation

Prepared for: Kona Compass

Date: 2026-04-13

Prepared by: OpenClaw

Executive Summary

Kona Compass operates in a real and growing premium niche: control systems and rotator accessories for forward-facing/live sonar users.

Buyers in this category already accept premium hardware pricing, and current competitor data shows market acceptance of roughly €330 for manual mounts, €1,100 to \$1,200 for motorized systems, €1,700 for advanced automated systems, and \$2,500 to \$2,800 for premium integrated aiming systems.

Recommended launch MSRP: €1,190 for Europe and \$1,290 for USA/Canada.

Recommended launch offer: €990 to €1,090 and \$1,090 to \$1,190.

1. Research Goal

This document answers four questions:

- Is there a real market for Kona Compass?
- What direct and indirect competitors already exist?
- What price range is credible and competitive?
- What product and sales implications follow from this market structure?

2. Product Definition Used for Analysis

Kona Compass is currently described as a smart rotator for live sonar / live transducer control.

Target compatibility:

- Garmin Panoptix LiveScope
- Lowrance ActiveTarget
- Humminbird MEGA Live

Current documented feature set:

- precision up to 0.3°
- compass
- remote control
- foot pedals
- 5 operating modes
- 6 speeds
- auto-search in sectors 20° to 340°
- low power consumption
- quiet motor
- smooth rotation
- stainless steel + sealed aluminum housing
- compatibility with Garmin / Lowrance / Humminbird

3. Market Structure

Kona Compass sits in the segment of **forward-facing sonar accessories / live sonar transducer control systems**.

This category includes manual rotators, motorized rotators, automated search systems, aiming systems with foot control, and transducer control accessories integrated with trolling motors or poles.

Customers in this category have already accepted expensive electronics setups. That makes a premium accessory in the \$1,000 to \$1,500 range commercially plausible.

4. Regional Market Readiness

United States

The USA is the strongest priority market due to adoption density, premium buyer behavior, dealer networks, and influence channels.

Canada

Canada is a strong adjacent market with similar buyer logic and strong relevance for premium predator/walleye electronics fishing.

Scandinavia

Scandinavia is highly promising because of technical buyer maturity, predator fishing culture, and fit with rugged engineering-led positioning.

Broader Europe

Europe is viable, but fragmented. Practical expansion order: USA, Canada, Scandinavia, Germany/Netherlands/UK, then broader Europe.

5. Competitor Comparison

Brand / Product	Approx. Price	Tier	Compatibility	Key Features	Takeaway
S-Pointer Manual	€330	Entry / manual	Garmin, Lowrance, Humminbird	Manual rotator, pole system	Low-end floor, not direct Kona Compass benchmark
S-Pointer Motorized	€1110	Mid-tier motorized	Garmin, Lowrance, Humminbird	Motorized rotation, foot pedal, autoscan, speed control	Important direct pricing anchor
S-Pointer Automated	€1700	Upper mid-tier / advanced	Garmin, Lowrance, Humminbird	Autoscan, lock function, wireless remotes, speed control	Shows advanced specialist price ceiling
Cornfield Live Sweep	\$1099–1199	Mid-tier motorized	Major live sonar brands	12V powered sweep arm, 320° adjustment, wired/wireless pedal, remote	Strong US benchmark
Humminbird TargetLock Adapter	~\$1499	Brand-led premium add-on	Humminbird ecosystem	Brand ecosystem lock-in, aiming/locking logic	Confirms premium willingness
Revolution Sonar RS1	\$2595–2795	High-end premium	Brand/model-specific variants	Precision aiming, rotary foot control, heading logic	Premium anchor above Kona Compass

6. Detailed Competitor Notes

S-Pointer

Source: sonarpointer.com/products.html

Observed listings show Manual S-Pointer around €330, Motorized S-Pointer around €1110, and Automated S-Pointer around €1700. Motorized and automated variants include brand compatibility, foot pedal control, speed control, autoscan, and wireless remotes on advanced versions.

Cornfield Live Sweep

Source: cornfieldfishinggear.com

The product page shows a range of \$1,099.00 to \$1,199.00 and describes a 12V powered sweeping arm with up to 320° adjustment, wired or wireless pedal options, and a wireless remote fob.

Revolution Sonar RS1

Source: revolutionsonar.com/collections/all

Observed current prices include:

- RS1 - Garmin Force 50 Inch: \$2,745.00
- RS1 - Garmin Force 57 Inch: \$2,795.00
- RS1 - Lowrance Ghost 47 Inch: \$2,595.00
- RS1 - Lowrance Ghost 52/60 Inch: \$2,645.00

Humminbird TargetLock

Search-backed references:

- humminbird.johnsonoutdoors.com
- russellmarineproducts.com
- hydrillagear.com

Search-backed pricing indicates TargetLock adapter kits around \$1,499.99 and full systems roughly in the \$2,533 to \$2,999 range.

7. Pricing Recommendation

Why Kona Compass should not be cheap

In this category, a low price can imply DIY-grade quality, weak reliability, low support confidence, and higher risk on the water. Premium sonar buyers care more about confidence than bargain optics.

Recommended price corridor

- **Conservative entry range:** €890 to €1,190 / \$949 to \$1,290

- **Recommended serious launch range:** €1,090 to €1,390 / \$1,190 to \$1,490
- **Strong premium-mid range:** €1,190 to €1,490 / \$1,290 to \$1,590

Best current recommendation

Europe MSRP: €1,190

USA/Canada MSRP: \$1,290

Launch / early-adopter offer: €990 to €1,090 and \$1,090 to \$1,190

8. Where Kona Compass Can Win

- **Precision:** 0.3° claim is powerful if demonstrable
- **Control architecture:** pedals + remote + compass + modes + speeds + sector search
- **Multi-brand compatibility:** one product for Garmin / Lowrance / Humminbird
- **Engineering feel:** stainless steel, sealed aluminum housing, quiet motor, smooth rotation
- **Price-to-capability ratio:** serious system below ultra-premium tier

9. Main Commercial Risks Before Launch

- exact retail price
- full package contents
- warranty terms
- shipping geographies and timelines
- installation clarity
- country of origin
- confirmed compatibility matrix
- proof of reliability in real conditions

These gaps will directly affect conversion and dealer confidence.

10. Final Conclusion

Market verdict: the market is real and commercially valid.

Competitive verdict: Kona Compass belongs in the serious motorized / advanced control tier, not the budget tier.

Pricing verdict: the most credible current launch recommendation is €1,190 in Europe and \$1,290 in USA/Canada.

Strategic verdict: Kona Compass should be positioned as a premium, engineering-led, precision live sonar control system for serious anglers who want more control, more confidence, and less compromise on the water.

Appendix B — Confidence Notes

High confidence: competitor pricing bands, category existence, positioning of the main product layers, Kona Compass belonging to premium-mid rather than budget tier.

Medium confidence: final MSRP still depends on manufacturing cost, dealer margin, shipping, warranty, and support structure.

Low confidence / not yet validated: final pricing elasticity without live market testing and conversion impact of missing trust assets such as video, testimonials, and installation proof.
